

CREATACOR Graphic Requirements

General Information

- Be sure that all of your images will output at 150 DPI at final printing size.
- All files should be RGB.
- Maximum print width is 59".
- Please no embedded images in Illustrator.
- We cannot guarantee good results with transparencies and styled effects used in Illustrator or InDesign.
- PLEASE OUTLINE ALL FONTS. (True Type not recommended for digital printing.)
- We require a hard copy proof or pdf for each file to be output.

Vinyl Requirements

Any art required for vinyl that is sent in as a JPEG, TIFF or Bitmap files will have to be recreated. All vector art should be saved as EPS files.

Color Requirements

If you have specific Pantone color requirements that need matching when printed, please supply them when ordering prints.

Application Requirements

The applications we are currently using are:

- Adobe CS4 (Illustrator, Photoshop, InDesign, etc.)
- Quark XPress 7.3

Font Requirements

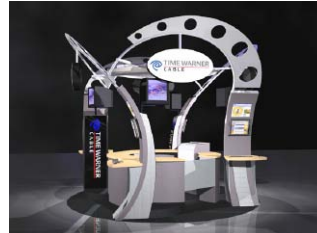

Please outline all fonts. In the event this is not possible, please be sure to include all fonts necessary for your file when sending us your work. This will insure that all of your files will print exactly how you designed them. We do not accept True Type Fonts. If you are using True Type Fonts, please outline them and replace them in your file. Please make sure all of your fonts have all of their screen and printer fonts.
