

# GRAPHIC REQUIREMENTS

- Be sure that all your images are at least 150 DPI at final printing size for best results
- All files should be RGB
- Maximum print width is 59.5"
- Images that will be mounted require an 1/8" bleed around the perimeter
- Please no embedded images in Illustrator
- We cannot guarantee good results with transparencies used in Illustrator or In Design
- Please outline your fonts or if necessary take the time to make sure you include all fonts for your files, suitcase and printer fonts  
*(Truetype fonts not recommended for digital printing)*
- We require a hard copy proof or pdf for each file to be output

## VINYL REQUIREMENTS

Any art required for vinyl that is sent in as JPG's, Tiff's, or Bitmaps files will have to be recreated. All vector art should be saved as EPS files.

## COLOR REQUIREMENTS

If you have specific Pantone colors that need matching when printed, please supply them when ordering prints.

## APPLICATION REQUIREMENTS

The application programs we are now using are:

▶ InDesign CS2 ▶ QuarkXPress 6.5 ▶ Illustrator CS2 ▶ Photoshop CS2

## FONT REQUIREMENTS

Be sure to include all fonts necessary for your file when sending us your work. This will insure that all of your files will print exactly how you designed them. We do not accept True Type Fonts. If you are using True Type Fonts, please outline them and replace them in your file. Please make sure that all of your fonts have all of their screen and printer fonts.
